### PROFILE SUMMARY

I'm building a career in Information Technology. Started with a focus on web development in the Front-End area. However, nowadays I can say that also have knowledge on Full Stack software development. I have a good foundation in database management and have exercised a lot my programming logic skills. Always thinking ahead, I aim to pursue postgraduate studies, including a master's and a doctorate.

Currently, I am ending a Bachelor's degree in Information Systems. Also I already have 1 year of professional experience.

### SKILLS

#### TECHNICAL SKILLS

JavaScript | HTML5 & CSS3 | React | Nodejs | Firebase |  
REST API | Tailwind | Git/Github | Sql | NoSql | Docker |  
MongoDb | MySql | Ruby | Python | TypeScript |  
Responsive Development | Nest | Next

#### SOFT SKILLS

Teamwork | Communication | Problem-Solving | Time  
Management | Attention to Detail

### WORK EXPERIENCE

#### ITNSIFY (2024 - PRESENT)

- Developed and maintained dynamic, responsive front-end applications using React, JavaScript, HTML, CSS, and TailwindCSS, ensuring seamless user experiences.
- Built and implemented UI components with Shadcn/UI, improving design consistency and development speed.
- Managed hosting, authentication, and database integrations with Firebase, achieving secure and scalable applications.
- Utilized Google Cloud Console for deploying and monitoring projects, optimizing system performance.
- Participated in Agile ceremonies (stand-ups, sprint planning, and retrospectives) to ensure timely delivery of project milestones and improved team collaboration.
