Profile summary

A passionate Software Developer with a strong focus on JavaScript, React, and Node.js. I love building applications that are not only functional but also intuitive and scalable. My journey in development has been fueled by a deep curiosity for solving complex problems and optimizing digital experiences.

With experience in full-stack development, I have worked on projects ranging from interactive web applications to backend architectures that power seamless user experiences. I take pride in writing clean, maintainable code and following best practices to ensure performance, security, and scalability.

My early projects were focused on solving everyday problems. One of my first creations was a Python bot that sent my parents the daily list of Airbnb guests via WhatsApp, automating a task that saved them valuable time. This experience reinforced my belief that technology can simplify lives and streamline processes.

Work experience

Itnsify (2023 – Present)

- Developed and maintained dynamic, responsive front-end applications using React, JavaScript, HTML, CSS, and Tailwind, ensuring seamless user experiences.
- Built and implemented UI components with Shadcn/UI, improving design consistency and development speed.
- Managed hosting, authentication, and database integrations with Firebase, achieving secure and scalable applications.
- Utilized Google Cloud Console for consume Google APIs, deploying and monitoring projects, optimizing system performance.
- Participated in Agile ceremonies (stand-ups, sprint planning, and retrospectives) to ensure timely delivery of project milestones and improved team collaboration.

Skills

React | Nodejs | JavaScript | TypeScript | HTML5 & CSS3 | Tailwind | Firebase | Sql | Nosql | GCP | REST API | Git/Github | Docker | MongoDB | MySql | Ruby | Python | ShadcnUI | Nest | Next | Responsive Development | Team work | Problem solving | Organization | Comunication | English and Portuguese
